

# Simple Installation :

Install the latest version of Syncfusion App

Link below:

☆ Syncfusion Components: <https://bit.ly/39pzH3R>

☆ Syncfusion React Components: <https://bit.ly/3lhzyB>

## Set up :

- craco.config.js
- tailwind.config.js
- package.json
- package-lock.json
- App.css
- Index.css
- create these files and copy the content as it is

## Start :

- Make a new folder
- type **npx create-react-app ./** on terminal
- Type **npm start** on terminal
- You can now access the website on <http://localhost:3000>

All the functionalities have been demonstrated on the video link given below :
